COPYING

The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/89/$5.00 + .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £38 net (US $75 in the USA and Canada) plus postage. The subscription price in the UK (which includes postage) to volumes 198–209, 1989, is £410, £450 elsewhere (US $880 in the USA and Canada) for institutions: £225 (US $450) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

Volume 206 September 1989

CONTENTS

On the stability of Kelvin waves. W. K. Melville, G. G. Tomasson and D. P. Renouard *page* 1

Flow in random porous media: mathematical formulation, variational principles, and rigorous bounds. Jacob Rubinstein and S. Torquato 25

Rotating stratified flow past a steep-sided obstacle: incipient separation. M. R. Foster 47

Three-dimensional thermal convection in a spherical shell. D. Bercovici, G. Schubert, G. A. Glatzmaier and A. Zebib 75

The viscous flow on surfaces with longitudinal ribs. D. W. Bechert and M. Bartenwerfer 105

On unsteady surface forces, and sound produced by the normal chopping of a rectilinear vortex. M. S. Howe 131

Open channel flows with submerged obstructions. Frédéric Dias and Jean-Marc Vanden-Broeck 155

Spin-up phenomena in non-axisymmetric containers. G. J. F. van Heijst 171

On the stabilization of a two-dimensional vortex strip by adverse shear. David G. Dritschel 193

The influence of initial deformation on drop breakup in subcritical time-dependent flows at low Reynolds numbers. H. A. Stone and L. G. Leal 223

Turbulent oscillatory boundary layers at high Reynolds numbers. B. L. Jensen, B. M. Sumer and J. Fredsøe 265

Optical and acoustic investigations of the dynamics of laser-produced cavitation bubbles near a solid boundary. A. Vogel, W. Lauterborn and R. Timm 299

The existence of steady flow in a collapsed tube. O. E. Jensen and T. J. Pedley 339

Three-dimensionality of organized structures in a plane turbulent wake. Michio Hayakawa and Fazle Hussain 375

Stability of Long's vortex at large flow force. M. R. Foster and F. T. Smith 405

Wave–vortex dynamics in rotating shallow water. Marie Farge and Robert Sadourny 433

Aerodynamic characteristics of a two-dimensional porous sail. S. Murata and S. Tanaka 463

On the lengthscales of laminar shock/boundary-layer interaction. Edgar Katzer 477

The effects of temperature-dependent viscosity and the instabilities in convection rolls of a layer of fluid-saturated porous medium. A. C. Or 497

Numerical simulations of multiple flow transitions in axisymmetric annulus convection. P. Le Quéré and J. Pécheux 517

Stabilization of dielectric liquid bridges by electric fields in the absence of gravity. H. González, F. M. J. McCluskey, A. Castellanos and A. Barrero 545

Experimental study of bore run-up. Harry H. Yeh, Abdulhamid Ghazali and Ingunn Marton 563

Oblique and parallel modes of vortex shedding in the wake of a circular cylinder at low Reynolds numbers. C. H. K. Williamson 579

Reviews

De la Causalité à la Finalité: A Propos de la Turbulence, by A. Favre, H. Guitton, J. Guitton, A. Lichnerowicz and E. Wolf 628

Random Seas and the Design of Maritime Structures, by Y. Goda 629

Rheology of Materials and Engineering Structures, by Z. Sobotka 630

Air–Sea Exchange of Heat and Moisture during Storms, by R. S. Bortkovskii 630
